

Contents

Current status and problems of the drainage system in Uzbekistan-----	1
*Reprinted by courtesy of the Japanese Association for Arid Land Studies	
Subject 1: Water Utilization	
Composition and classification of salts in surface water and groundwater in a semi-arid irrigated area - Case study in Mirzaabad district, Uzbekistan - -----	9
*Reprinted by courtesy of the Japanese Society of Sand Dune Research	
Actual Condition of Vertical Drainage for Farmland Salinization in the Republic of Uzbekistan----	23
*Translated and reprinted by courtesy of the Japanese Society of Irrigation, Drainage and Rural Engineering	
Water-saving Effect of Simplified Surge Flow Irrigation on Irrigated Farmlands in Arid Areas –A Case Study in the Republic of Uzbekistan -----	33
*Translated and reprinted by courtesy of the Japanese Association for Arid Land Studies	
Suitable inflow rate and furrow length for Simplified Surge Flow Irrigation -----	51
*Reprinted by courtesy of the International Society of Paddy and Water Environment Engineering	
Subject 2: Mitigation of Soil Salinization	
A Trial of Desalinization by Using Mole-Drain in the Republic of Uzbekistan-----	65
*Translated and reprinted by courtesy of the Japanese Society of Irrigation, Drainage and Rural Engineering	
Problems and Measures for the Adoption of Cut-drain and Its Applicability to Soil Conditions in Uzbekistan -----	75
*Translated and reprinted by courtesy of the Japanese Society of Irrigation, Drainage and Rural Engineering	
Characteristics of Salt Leaching in Saline Soil with a Subsurface Hardpan -A Study Using Undisturbed Soil Core Samples-----	91
*Translated and reprinted by courtesy of the Japanese Society of Sand Dune Research	
Salt Removal Technology by Shallow Subsurface Drainage in Combination with a Cut-drain -----	111
*Reprinted by courtesy of the Japanese Association for Arid Land Studies	

Salt Pushing Effect to the Side of the Ridge by Fixed Skip Furrow Irrigation - Case study in the
Republic of Uzbekistan ----- 119
