

## Contents

### Forwards

Monitoring of blast races to ensure durability of blast resistance in Japanese rice cultivars Shinzo Koizumi .....	1
Proposal for a new international system of differentiating races of blast ( <i>Pyricularia oryzae</i> Cavara) by using LTH monogenic lines in rice ( <i>Oryza sativa</i> L.) Nagao Hayashi and Yoshimichi Fukuta .....	11
Protocols for the sampling of diseased specimens and evaluation of blast disease in rice Nagao Hayashi, Nobuya Kobayashi, Cassiana M. Vera Cruz and Yoshimichi Fukuta.....	17
Genetic characterization of universal differential varieties for blast resistance developed under the IRRI-Japan Collaborative Research Project using DNA markers in rice ( <i>Oryza sativa</i> L.) Yoshimichi Fukuta, Donghe Xu, Nobuya Kobayashi, Mary Jeanie Telebanco-Yanoria, Aris Hairmansis and Nagao Hayashi .....	35
Identification of blast resistance genes in IRRI-bred rice varieties by segregation analysis based on a differential system Nobuya Kobayashi, Leodegario A. Ebron, Daisuke Fujita and Yoshimichi Fukuta .....	69
Comparison of DNA marker analysis of the blast resistance genes <i>Pib</i> and <i>Pita</i> in IRRI-bred rice varieties with gene estimation by conventional genetic analysis Daisuke Fujita, Leodegario A. Ebron, Nobuya Kobayashi and Yoshimichi Fukuta .....	87
Blast resistance genes and their selection markers in rice ( <i>Oryza sativa</i> L.) Yohei Koide, Nobuya Kobayashi, Donghe Xu and Yoshimichi Fukuta .....	95
Acknowledgements .....	123
