

List of Figures

Figure 3-1.	Flowchart of the crop sector.	28
Figure 4-1.	Relation between the maximum net CO ₂ exchange rate (P_m) and maximum gross biomass production rate (b_{gm}).	33
Figure 4-2.	Relation between temperature and maximum net CO ₂ exchange rate (P_m) of rice, Japonica, wetland.	34
Figure 4-3.	Relation between temperature and potential yield.	35
Figure 4-4.	Relation between solar radiation and potential yield.	36
Figure 5-1.	Changes in income elasticity of crops.	40
Figure 5-2.	Changes in income elasticity of livestock products.	40
Figure 6-1.	Changes in crop yields attributable to climate change in the 2050s.	48
Figure 6-2.	Changes in crop yields in major producing countries.	49
Figure 6-3.	Changes in crop supply caused by climate change in the 2050s.	49
Figure 6-4.	Changes in all feed supply in South American countries.	50
Figure 6-5.	Changes in livestock product supply caused by climate change in the 2050s.	50
