

# JIRCAS Workshop Papers

No. 3 (March 1995)

## Bioproduction and the Role of Environmental Preservation in Brackish Water Regions

### Contents

#### Biology and Ecology in Brackish Water Regions

1. The food-chain and distribution of micro organisms in brackish waters  
Masachika MAEDA ..... 1
2. Species composition and distribution of zooplankton in subtropical brackish waters  
Shin-ichiro OKA ..... 3
3. Distribution and ecology of larval/juvenile fishes in brackish waters: Is the mangrove system really a cradle for fishes?  
Hiroshi KOHNO ..... 6
4. Effects of soil loading in brackish water areas  
Katsuhisa TANAKA ..... 7
5. Ecophysiological aspects and roles of the mangrove forests  
Kazuo NISHIMURA ..... 10
6. Problems in management, reforestation and utilization of mangrove forests  
Akira KOMIYAMA ..... 17
- Wise utilization of mangrove swamps  
Shigemitsu SHOKITA ..... 19

#### Biological Productivity and Material Circulation in Brackish Water Regions

1. "Productivity and sustainable utilization of brackish water ecosystems" project outline  
Masaaki SUZUKI ..... 25
2. Developmental processes of coastal plains and formative mechanisms of mangrove habitats  
Kiyoshi FUJIMOTO ..... 32
3. Production, oxidation, leaching and emission of radiative trace gases in wet lowland soils  
Katsuyuki MINAMI ..... 36
4. Zooplankton productivity measurement  
Tsutomu IKEDA ..... 39
5. The food-chain in subtropical/tropical brackish waters: A review  
Shigeo HAYASE ..... 40
6. Occupational conditions and locations of industry relating to brackish water areas in Indonesia: A case study  
Misa MASUDA ..... 44
